# **Historic, Archive Document**

Do not assume content reflects current scientific knowledge, policies, or practices.

- LOCATION—We are located in northern New Jersey and our climate is such as to test the extreme hardiness of all the varieties we list.
  - STOCK—Periodically inspected by State and Federal Supervisors. A certificate of inspection accompanies each order.
  - TERMS—"Cash-with-Order"—Our prices include packing charges. Remittances may be made by check or Post Office Money Order.
- **DELIVERY**—F.O.B. Nurseries, Bergenfield. If parcel post shipment is desired, add 10% to the total value of the order. On small parcels where plants are wanted in a hurry, a "Special Handling" stamp of 25c will speed up delivery. This is additional to the 10% for postage. We do not solicit orders for less than \$1.00.
- CLAIMS FOR DAMAGE IN TRANSIT—All goods are shipped at purchaser's risk after they are delivered to the forwarding company.

All other claims must be made direct to our office within five days of receipt of goods.

# GENERAL CULTURAL DIRECTIONS

No. 1—Common garden soil—light and well drained.

No. 2—1/3 loam—1/3 sand and gravel—1/3 leaf mold—suits most rock plants.

No. 3—Bog Plants—moist situation—1/3 peat—1/3 leaf mold or decayed turf—3/1 good loam. No. 4—Wood Plants—Acid loam—2/3 leaf mold (oak, beech conifers decayed leaves)—

1/3 loam—Avoid lime.

No. 5—Alpines—Moraine culture—Dig pocket 1½ ft. deep, fill 1 ft. with 1" or 1½" broken stones—balance filled with 2/3 coarse gravel and 1/3 leaf mold and loam.

Letter "E" following cultural number means exposed to full Sun.

"T?" following cultural number means 1/2 shade or morning Sun, or shelter from burning mid-day or afternoon Sun.

following cultural number means shade—northern exposure.

"M" following cultural number means to be grown with other plants, so roots may run together—preferably plants of same height.

EXAMPLE—Linaria Hepaticaefolia No. 4 LM—Acid loam—semi shade, planted with Sedum Ternatum or any other dwarf plant requiring same exposure.

While these cultural directions are the results of observation made and believed to be best suited for the different Rock Plants, the man or woman willing to experiment will find many thrills, successes and failures in trying other means. We repeat again that these directions are general in their scope, and meant to suit general locations.

# **MAYFAIR NURSERIES**

were established solely for the growing and propagating of Rock Plants and Alpines, in order to insure the American gardener a source of supply for these unusual and interesting little gems, also to give them the necessary help and advice pertinent to this subject.

Read this little catalog very carefully and attentively and you will find a solution for every problem that may present itself in the planting of the Rock Garden. Should you not find the information wanted, write to us in care of our Service Department,

and we will endeavor to solve it to your satisfaction.

Neither is this all—if you do not know how to begin your Rock, Wall or Bog Garden, send us all the details—size, exposure, heighth, nature of soil, and we will send you a working and planting sketch designed so plainly that anyone can read it. This is furnished gratis with an order for plants.

## ROCK GARDEN - WALL GARDEN - BOG GARDENS

We also specialize in these various forms of garden designing and planting. My staff is one of the most efficient maintained for this purpose. This is their only work, to design and build artistic and original Rock Gardens, Wall Gardens and Bog Gardens.

A life time guarantee on the construction work is given with every contract, and the plants are guaranteed for one year. Furthermore, I supervise all work from beginning to end. This is the best argument I can offer. I do stand behind my work at all times.

We have on our premises, a display Rock Garden, where all the little gems listed herein and a quantity of others are established and flourishing, and we always welcome visitors. We would appreciate, if visitors would give us the date of their coming in order to have a representative conduct them through the Rock Garden.

The Nurseries are closed on Sundays and Holidays.

Marcel LePiniec.

P.S.: All Photos used in the illustration of this catalog have been taken in our Rock Garden on our Premises.

### NOVELTIES

New plants of recent introduction and real merit are printed in bold characters—these have been tried for hardiness, foliage and flowering qualities and will (we are certain) cause you great delight and pleasure. Note them by the asterisk (\*) and the capital letters.

# - IMPORTANT -

We cannot urge too strongly the necessity of ordering early. While all our plants are of the same quality and size, our stock on many varieties may run short and he who comes first, will be served first.

### 3 plants of a kind at the 10 rate

	Cul- ture	Height	Price Each	Per Ten
ACAENA—Rosaceae—Ground cover.				
100 Glauca—Bluish foliage, very pretty and neat plant for contrast. For walks	1L	3′′	50c	\$4.25
*102 ARGENTEA—Pure white silvery foliage—White Fl.	1E	4''	50c	4.25
104 Clavenae—Silvery grey foliage, forming solid clumps		-	,	1.20
—white	1E	6''-	50c	4.25
*106 NANA—Dwarf carpeter, very compact—finely cut foliage—white Fl.—rare—June—Walks	1E	4''	50c	4.25
108 Tomentosa—Woolly Yarrow—Compact woolly tufts	- 17	011	20	0.70
of cut foliage—June till Fall—Yellow* *109 UMBELLATA—A beautiful plant with pure silver	1E	6''	30c	2.50
white foliage, delicately cut and neat. Pure white flowers. Rare	1E	6''	50c	4.25
AETHIONEMA—Cruciferae—Lebanon candytuft. Com-				
mon soil.				
110 Grandiflorum—Bushy grower—glaucous foliage—graceful racemes of rosy blossoms	1E	10′′	35c	3.00
111 <b>Iberideum</b> —A dwarf species with fine white flowers. New. Fine for Walls	1E	4''	75c	6.25

	Cul- ture	Height	Price Each	Per Ten
112 Pulchellum—Prostrate and beautiful—soft—rose 114 Schistosum—Compact grower—erect, rosy pink All these need sharp drainage and full exposure to Sun—good for wall.	1E 1E	6'' 6''	75e 75e	\$6.25 6.25
ALYSSUM—Cruciferae—Madwort—ordinary soil—fine for wall.				
116 Argentum—Flat corymbs of bright yellow. Silver	1.13	10//	40	0 50
leaves—blooms all Summer—after Saxatile  118 Moellendorfianum—Bushy specie with grey foliage.	1E	10′′	40c	3.50
Dense grower, blooms 'till August	1E	10′′	50c	4.25
iage and yellow flowers. May-August	1E	$4^{\prime\prime}$	40c	3.50
or cataract of pure yellow in early Spring	1E	$10^{\prime\prime}$	25c	2.25

rose pink flowers. *194 VINDICTIVE—Another novelty—really an improved	2-0	o o	100	
Laucheana—superb deep crimson—seldom out of bloom	1	$6^{\prime\prime}$	75c	6.25
ARTEMISIA—Compositae—Wormwoods—Ordinary soil. 196 Abrotanum—The "old man" of old fashioned gar-				
dens—very aromatic and finely cut foliage—grey.  To be trimmed from time to time to keep dwarf.				
White flowers.  * 198 FRIGIDA—The "Arctic Wormwood." My name for	1	12''	35c	3.00
it is Silver Cloud. No other description can put it better. A wonderful plant for any use. Aromatic—				
yellow flowers. Wants a dry spot. Fine on wall  ARRHENATHERUM—Gramineae—Ordinary soil.	1	12''	50c	4.25
* 200 BULBOSUM VARIEGATUM—Dwarf form of ribbon grass, with white and green stripes	1	6"	35 <sub>c</sub>	3.00
ASPERULA—Rubiaceae—Woodruff. 202 Odorata—The sweet woodruff—emit a sweet hay fra-				
grance when dried—a neat ground cover for shady places—White	4L	6''	35c	3.00

	Cul- ture	Height	Price Each	Per Ten
ASTER—Compositae—Common soil. 204 Alpinus—Charming dwarf Spring blooming aster				20,0
with clear lavender flowers set one to a stem—pro- fuse bloomer*206 MAUVE CUSHION—Mat forming type, rapid grower	1	6''	35c	\$3.00
—large size mauve flowers in large numbers—one of the latest bloomers in the rock garden—October	1	6''	50c	4.25
AUBRIETIA—Cruciferae—False Wall Cress.  208 Deltoidea—A good plant for ground cover or to plant in wall—Early Spring bloomer. Violet colored flow-				
ers—trim after blooming	1	$4^{\prime\prime}$	35c	3.00
*210 ROTUNDIFOLIA COERULESCENS—A most dainty rock plant—resembles the flowers you see in				
books. Too dainty to be real. Pale lavender blue with pale yellow center, blooms Spring, Summer and Fall				
—October 29th, and one of my plants has eight blooms on it. Plant in masses	1	1''	40c	3.50
212 Minutum—A pigmy if any—the foliage I" high—the blossoms sitting almost on it—Pink, turning	1L	1''	50c	
white. Will form nice size tufts if slightly protected  BRUCKENTHALIA—Ericaceae—Bushy Heather—peaty soil.	117	1	90e	
*214 SPICULIFOLIA—A compact little bush, upright dwarf, and evergreen—hardier than most heathers, with delightful heads of clear pink rose flowers end-				
ing each branch—a rare gem—grows well in sun or semi shade	4L	8" \$	1.00	
CALAMINTHA—Labiatae-Calamint—Ordinary soil. 216 Alpina—Mat forming plant—aromatic foliage, blooms all along, light violet spikes of flowers	1	4''	35e	3.00
CAMPANULA—Campanulaceae—Bell flowers. 218 Abietina—A rare and delightful specie—Reddish				3.00
purple bells on 9" stems—spreads quite rapidly 220 Caespitosa—A close simile of Pusilla—spreads faster —light blue tiny bells in profusion	oLM 2LM	9'' 4''	75e 75e	
222 Carpatica—A good plant where space has to be filled —Blooms all Summer—Big blue upright bells in				9.00
profusion	1'' 1	6'' 6''	35c 35c	3.00
and paler flowers—star more open* *228 GARGANICA—In my opinion the most satisfactory	2L	3′′	75c	
of all the Alpine bell flowers. The plant is really a solid mass of clear lavender blue stars, opening day after day for over two weeks in June. Stands Sun,				
but flowers last longer in lightly shaded position 230 <b>Glomerata Acaulis</b> —A very rare Bluebell of tufty habit—the flower cluster hardly rising above foliage.	2L	3′′	75c	
Covered with intense violet blue bells of large size 232 Macrorrhiza—A rare Bluebell, blooming very late—	2L	4''	75c	
Fine Blue flowers—wants full sun and limy compost.  234 Muralis Portenschlagiana—The true form, deep violet blue—dwarf, forming large mats once estab-	5E	4′′	75e	
lished—easy, very floriferous—Mrs. Wilder calls it "a real delight," so do I	2L	3′′	50c	4.25

### SHRUBS - EVERGREENS AND CONIFERS

We take a pardonable pride in our stock of conifers and evergreen shrubs. Not only are those varieties herein listed entirely suited for the Alpine or Rock Garden, but in addition—owing to their low stature—are more valuable than the taller sorts for plantings around the home grounds. They add that touch of vibrant pulsating life to the winter garden that is not only charming and delightful but also really essential.

Our stock is of the very highest quality, transplanted at least twice and often three or four times, thus insuring that very healthy root condition which constitutes a prime

necessity for all evergreens.

Prices—except where otherwise noted—include balling and burlapping. In other words they are shipped, so dug and wrapped, that a good sized ball of earth around the roots is included.

ANDROMEDA—Plant in wood loam soil in semi-shade. The Lily-of-the-Valley Bush. 1000 Catesbaei—Attractive white flowers in May followed by delightful coloring in the Autumn. Fine specimen plants. 15"....Each \$2.25 1002 Floribunda—Similar to the above but more floriferous and somewhat earlier

15"....Each \$3.25 in blooming. Fine specimen plants.

AZALEA—Prefers wood loam soil, or other soil with humus.

1004 Amoena—The Japanese Azalea; purplish red flowers in abundance with fine contrasting foliage. A delight in late April. Each 6" to 8"....\$1.25 8" to 10"....\$1.50 10" to 12"....\$2.25

1006 Hinodegiri—The Red Japanese Azalea; flowers bright carmine-pink most effective in groups, fine companion to Amoena. Fine bloomer. Each 6'' to 8''....\$1.30 8'' to 10''....\$1.75 10'' t 10" to 12"....\$2.50

BIOTA—Ordinary garden soil. Indifferent as to position. 1008 Orientalis Compacta—Siebold's Arborvitae, fine brilliant green color, very neat and compact in growth. Fine specimen plants. Each 12"....\$1.50 15"....\$2.00 1010 Orientalis Compacta nana aurea—Berchman's Golden Arborvitae. A very fine slow grower most suitable for rock gardens, fine golden yellow foliage. Each 6" to 8"....\$1.25 A superb kind that we strongly recommend. 10" to 12"....\$2.00 8" to 10"....\$1.75  $18'' \dots \$4.50$ 

BUXUS—Ordinary garden soil. The Dwarf Box.

1012 Suffruticosa—The true Dwarf Box. A real little green gem for specimen planting in the rock garden, or for edgings to the formal plantings. Per ten bushes 4"....\$3.25 6"....\$6.00 8"....\$10.00 10"....Each \$1.50 Not balled or burlapped.

COTONEASTER—Ordinary garden soil. Fine spreading bushes.

Each 12"....\$1.25 15"....\$1.75 1016 Macrophylla—The dwarf Rockspray, very small, very dark green ovate leaves and dwarfer than the preceding variety.

Each 15"....\$1.50 CHAMAEDAPHNE—Ordinary garden soil. The Leatherleaf.

1018 Calyculata—White flowers in April. This species holds it's leaves throughout the Winter. Very useful and attractive. Each 15" to 18"....\$1.75 18'' to 24''....\$2.25

DAPHNE—Ordinary garden soil, but the addition of humus is beneficial.

1020 Cneorum—The Garland Flower, An aristocrat of the evergreens. Narrow glossy leaves and fragrant bright pink flowers. Strong plants. Each....\$2.50 1022 Mezereum—One of the charmers of the early Spring rock garden display with

pinkish lilac blossoms. Flowers appear before the leaves. Not an evergreen but very delightful. A real gem. Pot grown plants only. Each....\$1.25

**EUONYMOUS**—Ordinary loamy soil. The Baby Wintercreeper.

1024 Radicans Minimus—A charming tiny evergreen creeper, clinging to stones and making a fine cover. Each 15" to 18"....\$1.25

JUNIPERUS—Ordinary soils. The Junipers. 1026 Chinensis Sargenti—Sargent's Juniper. A most valuable evergreen ground cover and rock plant. Prostrate habit with fine green color. Each 12" to 15"....\$3.50

1028 Communis depressa—Prostrate Juniper. Spreading rbanches, neat and very

 $18'' \dots \$2.00$ 

interesting in the rock garden. Each 18"....\$2.50 1030 Excelsa Stricta—Spiny Greek Juniper. Compact pyramidal shape, gray-green foliage. Fine for accentuating or for contrasty effects.

Each 12"....\$2.25

1032 Horizontalis Sabina Prostrata—Savin's Creeping Juniper. One of the neatest of the trailing Junipers, well adapted to rock garden. Each 15"....\$2.00

1034 Horizontalis Douglassi—The Waukegan Juniper. Long trailing branches with steel-blue foliage and makes a most delightful contrast against rockwork. The very best of the Junipers. Fine winter color. Each 15"....\$3.00

1036 Japonica—The Japanese Juniper, a low and slow grower and a mots welcome and valuable addition to the well-stocked rock garden. Most beautiful green Each 8" to 10"....\$2.00 scaly leaves. Altogether a delight.

1038 Sabina tamariscifolia—The Tamarisk Juniper. Like the Waukegan Juniper this variety is one of the best of the species. It is a flat spreading kind with a very fine soft texture, choice. Each 12" to 15"....\$2.50 15" to 18"....\$3.25

1040 Japonica aurea varigata—The variegated golden Japanese Juniper. Fine for Japanese effects in the rock garden. A most delightful sort with golden tipped Each 12"....\$3.00 leaves, irregularly placed branches. Our stock is limited.

1042 Virginalis globosa—The Globe Japanese Juniper. Spherical-shaped thin round branches, very odd and in all ways very fine. Each 12''....\$2.50  $15'' \dots \$3.00$  $18'' \dots \$4.00$ 

LEIOPHYLLUM—Sandy wood loam soil. Sun or shade. The Sand Myrtle. 1044 Buxifolium-Very fine shrub with pinkish white flowers, symmetrical and

delightful spreading habit, small soft green leaves. Each 8" to 12"....\$1.50 1046 Prostratum—The Alleghany Sand Myrtle, somewhat similar to the above but perhaps even more choice. Each 6" (spread) . . . . \$1.25

PICEA—Ordinary soil—The Spruces.

1048 Alba Albertiana—Dwarf Alberta Spruce. Very slow growing kind, compact and most desirable for small scale plantings. We have only a very limited stock of this rare little gem. Each 10"....85.25 12"....86.50

1050 Excelsa Pumila—Dwarf Norway Spruce, a slow growing and very choice variety with deep green foliage. Most interesting and useful. Each 12"...\$5.00

PINUS—Ordinary soil.

1052 Montana Mughus—The Mugho Pine. This variety forms a most attractive round topped bush and is equally suitable for rockery or for foundation plantings.

Each 15"....\$4.00

RETINISPORA—Ordinary garden soil. The Cypresses.

1054 Ericoides—The Heather Cypress, this variety has leaves which resemble the heather and which gives it a very pleasing cloud-like effect.

Each 18"....\$2.50 24"....\$4.00 1056 Obtusa Gracilis—The Slender Hinoki Cypress, a variety forming a pyramid

of a beautiful rich shade of green, a very slow grower, a gem. Each 18"....\$4.00

Each 18"....\$4.00 24"....\$5.00

1058 Obtusa Gracilis Compacta—The compact Hinoki Cypress, similar to the above which might be termed the "vest pocket edition" of this very charming and delightful variety. Slow grower. Limited stock.

Each 12"....\$3.50 18"....\$5.00 24"....\$6.50

1060 **Obtusa Nana**—The dwarf Hinoki Cypress. We quote a well-known author: "This tiny Hinoki Cypress is a most engaging pygmy with short deep green branchlets." Grows very slowly. Limited stock. Each 10"....\$3.00

1062 Obtusa Nana Aurea—The Golden Dwarf Hinoki Cypress. The beautiful golden variety of the above gem. Very slow grower. Fine. Each 10"....\$3.00

1064 Plumosa Lutescens—The Dwarf Yellow Plume Cypress. Forms a low round shaped bush with yellow tipped branches. Fine and interesting.

Each 15"....\$3.50 18"....\$5.00

RHODODENDRON—Acidy wood loam.

The ALPINE RHODODENDRONS. Lovely dwarf kinds. Very choice.

1066 Myrtifolium—A lowly little gem with soft red flowers and fine foliage, choice kind which seldom exceeds 24 inches in height. Grand.

Each 15" to 18"....\$6.00 24"....\$10.00

1068 Ovatum—A fine companion to the above with light pink blossoms and foliage of a lovely green color. It is similar to the above with a neat habit of growth. Rarer than the above type. Each 12"....\$5.00 15"....\$7.50

1070 Wilsoni—A very pretty pearly pink color with foliage of the type. very A valuable dwarf evergreen for the rock garden.

Each 15"....\$3.50 18"....\$4.50 24"....\$10.00

1072 Carolinianum—The Carolinan Rose Bay, lovely rose-purple flowers and of a very compact bushy growth, thriving best in moist shady places.

Each 12"....\$2.50 15"....\$4.00 18"....\$5.50 24"...\$10.00

1074 Carolinianum album—The white flowered variety. A fine companion to the above. Fine for massed plantings.

Each 12"....\$2.50 15"....\$4.00 18"....\$5.50 24"....\$6.50

1076 Catawbiense—The Catawba Rose Bay—Lovely large rosy purple blossoms with fine deep green leaves. Profuse bloomer. Thrives in half shade. Each  $24''\ldots\$3.00$   $30''\ldots\$4.00$ 

1078 Minus (punctatum)—The Piedmont Rhododendron—Pale pink flowers, a very choice species and quite slow in growth. Fine foliage. Each 18"...\$5.00

TAXUS—Ordinary garden soil. The Yews.

1080 Baccata adpressa erecta—The Short Leaf English Yew. Delightful upright, neat habit with stiff green foliage crowded on the branches. Fine.

Each 10" to 12"....\$2.00

1082 Baccata repandens—Spreading English Yew. A fine variety with spreading horizontal habit and lovely dark blue-green color. Most valuable and interesting.

Each 15"....\$3.50 18"....\$5.00 24"....\$6.00

1084 Cuspidata brevifolia—Dwarf Japanese Yew. Broad thick leaves of very dark green color. The Arnold Arboretum states that this is the most valuable of all dwarf evergreens.

Each 12"....\$4.00

THUJA—Ordinary garden soil. The Arborvitaes.

1086 Occidentalis globosa—The Globe Arborvitae—Fine round shaped evergreens which may be put to many uses in every position in the rock garden. Each 12"....\$2.25 15".

1088 Occidentalis Hoveyi—Hovey's Arborvitae. A fine species with bright green foliage and oval in shape. Very symmetrical growth.

Each 15"....\$2.50

In bringing to a close our little brochure on the conifers and evergreens we again remind you that our stock is carefully selected and each shipment that we make may be taken as a criterion of what well-grown and healthy evergreens should be and again we repeat that we take a pardonable pride in being able to ship such fine specimens.

# "OUR BLUE RIBBON COLLECTION OF ROCK PLANTS AND DWARF EVERGREENS"

For the beginner who desires an assortment of easily grown Rock Plants suitable for his first venture into this delightful realm of alpine flora, we have made up a collection of desirables whose cultivation is simple and whose hardiness is beyond question. Indeed, we might call this collection the key stone of the rock garden.

### "BLUE RIBBON COLLECTION OF ROCK PLANTS"

Alyssum Saxatile Compactum	Helianthemum

ADDITIONAL VARIETIES OF ROCK PLANTS. Besides the many varieties of plants listed herein, we have on hand limited quantities of other rare and very charming kinds of rock plants and we solicit inquiries for any not listed. Remember we are devoting our energies exclusively to the growing and cultivation of Alpines and periodically receive plants and seeds from the leading American and European collectors of the rare and unusual kinds.

# A SUITABLE GIFT FOR CHRISTMAS, BIRTHDAY, OR ANY OCCASION

We have organized a gift department for the benefit of our Patrons. Nothing will please those that are dear to you and have a Garden more than a gift of plants to remember you by.

You tell us the amount you care to spend, and we will inform the recipients of the gift that a credit of so much for plants or bulbs, or anything contained in our catalogs, is open to them through your courtesy. At the proper shipping time, we send you bill for plants ordered. Of course, our catalogs are mailed as soon as you give us your friend's name and address for their selection.

### WALL GARDEN

People in general think that a wall must be made of cut stones, held together with mortar. You have then a very ordinary wall, a plain wall—a dead wall. If you have a wall to build and you want a beautiful living wall, build it according to the sketch, slanting each stone toward the center, and instead of using cement, use a compost made of onethird sandy loam and two-thirds leaf mold, one handful of sheep manure or bone meal to each pail of compost. Use dry and fill spaces between stones as you would concrete.

The dimensions given for width are minimum sizes, and wall may be made thicker if wanted. The thicker, the better. A slant of two inches to a foot is enough to catch rain. Use rough flat stones if possible—sand stone is best medium, as it retains moisture longer.

### FLOWERY PATHS

Why let grass and weeds grow in your stone path, or why build a concrete path in your garden? A beautiful and out of the ordinary walk is made of stepping stones planted with low and dwarf compact little gems tracing, with delightful foliage and flowers, the crazy lines and zigzags your fancy has designed.

First, make a shallow trench the length and width of your path, from 8" to 10" deep. Fill and pack bottom with four inches of coarse gravel, broken stones or cinders. The balance should consist of good rich compots from your heap, or made of one-third loam and two-thirds leaf mold. Press your stepping stones into it, making any design you wish. Water thoroughly to set stones firmly, then plant.
